

Asbestos Awareness Training

This class discusses the use of Asbestos Containing Building Materials (ACBM) in University campus buildings. Topics include the health effects associated with asbestos exposure, sources and uses of asbestos materials, types of materials present on the University campus, regulations in effect for asbestos workplace exposure and controls in place for the prevention of asbestos exposure in the work place.

Respirator Training and Fit Testing

Employees must wear respirators to protect themselves from hazardous chemicals and dusts in the air when doing certain tasks. This one hour training program discusses why respirators must be worn, the correct way to wear a respirator, medical requirements and how to properly clean, care for and maintain a respirator.

Fit testing is conducted by the Division of Safety and Compliance and involves the respirator types and styles available through Central Stores.
